EXPERIENCE

React Stack Developer — SCHIOLARDEN

2022 - Present

Scholarden in an online GRE-Test Preparation platform, My responsibilities are to build and manage their website using Nextjs and their mobile applications using React Native, along with firebase as a backend provider. I have built user-facing pages on websites and integrated Stripe and Paypal Payment Methods.

React Developer — SALDIRI

2020 - 2022

Working as React Js and React Native Developer at Saldiri, my responsibilities are to build UI/UX interfaces and connect REST APIs, help react interns and junior react developers in their work, and solve their queries & errors.

EDUCATION

Web & Mobile app developer — Online from SMIT

2019-2020

I have done Web and Mobile Hybrid app development Courses from Saylani Mass IT Training Karachi. We have covered HTML, CSS & Javascript and React js & React Native.

Intermediate — Govt. College

2017-2019

I have done FSC from Govt College For Boys.

PROJECTS

Siraan — React Native, Redux, REST API, JavaScript

Link to Play Store App: <https://shorturl.at/koLW5>

Siraan is developed on React Native using Redux as state management, Redux-Saga as a middleware, REST API for backend connectivity, React

LANGUAGES

- HTML
- CSS
- JavaScript
- Typescript

LIBRARIES/ FRAMEWORKS

- React Js
- Next Js
- React Native
- Redux
- Axios
- Material UI
- ReactNative Paper
- React Bootstrap
- Bootstrap

OTHERS

- Git
- Git Lab
- Bitbucket
- Firebase
- React Hooks
- React Native Element
- React Life Cycle
- Firebase Database
- Firebase Auth
- Vercel Hosting

TOOLS

- VS Code
- Chrome Debugger
- Postman

Native paper as a UI library, and many other packages.

In Siraan development my roles were to develop Pixel's perfect user-facing Screens (*for both android and ios platforms*) according to Adobe XD design and connect REST APIs.

Siraan is a CS-Cart-based e-commerce mobile app. Siraan mobile app is published on both the apple store and play store.

Scholar Den — *Nextjs, TypeScript, Firebase, Material UI*

Link to Project: <https://scholarden.com>

Scholarden is developed on NextJs using Firebase as a backend services provider along with TypeScript as a scripting language.

In the Scholarden web application development, my major tasks were to implement Stripe and PayPal payment methods and to develop all Guest facing pages.

ScholarDen is an online platform that provides the best GRE Preparation resources and real test-like environments to make sure students get the most out of the GRE.

Sell Any Wheel — *ReactJs, Redux, REST API, JavaScript*

Link to Project: <https://sellanywheel.com>

Sell Any Wheel (SAW) is developed on ReactJs using Redux as state management, Redux-Saga as a middleware, REST API for backend connectivity, Material-UI as a UI library, and many other packages.

SWA is a web app built for selling, buying, and running auctions on cars. We (*Me and My Colleague developer*) have started this project from scratch and made an attractive design and excellent user experience.

Meet U — *ReactJs, Jitsi Meet, Redux, REST API, JavaScript*

Meet U is a secure video conference calling app with face authentication. I have built the project from scratch, I have made the UI design of the project and then integrated REST Api's using redux-saga as middleware and managed state using redux. I have integrated video calling using Jitsi Meet an open-source platform for video calling.

Chat Buddy — *React Native, React Native Gifted Chat, ...*

Chat Buddy is a social media app. Basic functionality is Chatting and sharing newsfeeds with friends. Chat Buddy is built using firebase services. Firebase Phone authentication is used for login and creating accounts using firebase OTP verification. Firestore is used for storing users' data in cloud storage. React Native paper is used for UI building and react-navigation

LEARNING GOALS

- NodeJs
- MongoDB
- REST API Development
- VueJs

INTEREST & HOBBIES

- Coding/ Programming
- Learning New Tech
- Traveling
